and Fisher, op cit. For a more detailed analysis of labor supply and demand and market institutions, see a text on labor economics, such as Ronald G. Ehrenberg and Robert S. Smith, *Modern Labor Economics*, Scott Foresman and Co. A good discussion of problems in the data can be found in the report of the *1979 National Commission on Employment and Unemployment Statistics*. The report contains a number of background papers in addition to the summary of recommendations.

The data series described in this article only hint at the large quantity of statistics that describe the labor market; many more series can be found in two monthly publications of the BLS. *Employment & Earnings* summarizes current and historical statistics collected from both the household and establishment surveys. The *Monthly Labor Review* also summarizes labor market statistics. It also contains articles that discuss many aspects of labor markets, data concepts, data collection procedures, and the series themselves; several of the articles were helpful in preparing this paper, such as an article contrasting the payroll and household estimates of employment in the August 1989 issue. Finally, the *BLS Handbook of Methods*, revised and published periodically, presents a discussion of the technical aspects of how the BLS collects, transforms, estimates, and presents labor market data.

Economic Review Index 1989

Volume 75

Federal Reserve Bank of Richmond

January/February	Determinants of the Federal Funds Rate: 1979-1982	Timothy Cook
	Monetary Aggregates: A User's Guide	John R. Walter
March/April	Banking under Changing Rules: The Fifth District since 1970	David L. Mengle
	Lender of Last Resort: The Concept in History	Thomas M. Humphrey
	Improving America's Competitiveness	H. Robert Heller
	An Examination of International Trade Data in the 1980s	Michael Dotsey
May/June	The Future of Deposit Insurance: An Analysis of the Alternatives	Anatoli Kuprianov and David L. Mengle
	Fifth District Banks' Return on Assets: Highest in Decade	John R. Walter and Donald L. Welker
	Market Responses to Pricing Fedwire Daylight Overdrafts	David B. Humphrey
July/August	Precursors of the P-Star Model	Thomas M. Humphrey
	The U.S. Productivity Slowdown: What the Experts Say	William E. Cullison
	Macroeconomic Price Indexes	Roy H. Webb and Rob Willemse
September/October	Some Further Results on the Source of Shift in M1 Demand in the 1980s	Yash P. Mehra
	M2 and Monetary Policy	Robert L. Hetzel
	The Changing Labor Force: Some Provocative Findings	William E. Cullison
	Changes in Manufacturing Employment in North Carolina Counties, 1980-85	Christine Chmura and Jane Ihrig
November/December	Estimating Intertemporal Elasticity of Substitution: The Case of Log-Linear Restrictions	Ching-Sheng Mao
	Labor Market Data	Roy H. Webb and William Whelpley
	Top Performing Small Banks: Making Money the Old-Fashioned Way	Benton E. Gup and John R. Walter
